

Wizard of Font

The Wizard takes you through the yellow brick road flowchart of questions, including photo questions, to get you the best font for your project.

Wizard of Font will help users find the font they need for their project. We will guide them through a flowchart that gathers technical specifications from them in a way they understand, including questions about the feeling they are going for and the type of project they are working on. At the end of the road, users will be presented with a list of fonts that they can try that fit their answers. For more advanced users who have some design knowledge, the Wizard will also allow them to find fonts that fit certain parameters instead of being guided by the flowchart.

Front End Dev

- Quickly get a font and get back to coding
- Get advice on font types and common usage

Student

- Improve projects and presentations with great fonts
- Advertise her RSO with style
